

Title : ER Diagram

Diagram :

Description :

The ER Diagram of the Online Complaint Registration System illustrates the relationship between different entities such as User, Complaint, Assigned, and Message. The User entity stores user details and allows user to register complaints. The Complaint entity contains complaint information such as address, city, state, pincode , status, and comments. The Assigned entity is used to assign complaints to agents for resolution. The Message entity enables communications. This ER Diagram helps in understanding the database structure and relationship within the system.
